

Daniel Ababu Tegegen

Software Engineer

✉ daniel.ab.tegegen@gmail.com ☎ +251966979737 📍 Addis Ababa, Ethiopia 🔗 LinkedIn 🐙 Github

Education

- BSc in Software Engineering**, Addis Ababa Science and Technology University 📄 05/2022 – 06/2026
Addis Ababa, Ethiopia
- Relevant Courses: Data Structures and Algorithms, Distributed Systems, Operating Systems, Object-Oriented Programming, Database Systems, Computer Architecture and Organization.
- Coding Academy**, Africa To Silicon Valley (Backed by Google) 📄 11/2023 – 11/2024
Addis Ababa, Ethiopia
- Completed a 30+ hours per week curriculum focused on DSA. Mastered advanced concepts and techniques through weekly lectures, contests, mock interviews, and pair programming.
 - Solved 1300+ coding challenges across LeetCode 📄 and Codeforces 📄.

Professional Experience

- Head of Education and Software Developer**, Africa to Silicon Valley (A2SV), Backed by Google 📄 01/2025 – Present
Addis Ababa, Ethiopia
- Designed and taught intensive courses in algorithms, **data structures**, and clean code for **150+ students**, improving technical interview success rates.
 - Mentored 30+ backend developer interns in **Go and MongoDB**, establishing standards for production quality systems and structured code reviews to accelerate project delivery.
 - Automated student performance tracking infrastructure using Python scripting and Google Apps Script, reducing reporting latency from 1 hour to under 3 minutes.
- Software Developer Intern**, Eskalate 📄 06/2024 – 09/2024
Addis Ababa, Ethiopia
- Developed a complete task management backend with **Go, Gin, and Clean Architecture** in 3 weeks, enhancing task tracking and workflow efficiency.
 - Implemented 9+ Restful APIs for authentication, real-time collaboration, and progress updates, ensuring consistent and low-latency data exchange.
 - Delivered a production ready backend with optimized performance, modular structure, and maintainable codebase adopted by the engineering team.

Projects

- Genzebe** 📄, Financial Tracker App 08/2024 – 09/2024
- Architected a distributed financial tracking platform serving personal and group expense management, leveraging **Go, MongoDB** transactions, and Redis to deliver ACID-compliant balance reconciliation.
 - Directed a team of 3 backend engineers, designing concurrent services and event driven processing pipelines that improved expense audit efficiency by 3× and ensured accurate financial reporting.
 - Reduced balance query latency by 65% (1.7s → 0.6s) through **Redis caching and asynchronous worker** pipelines, while implementing CI/CD automation, unit testing, and audit logging to improve system reliability and maintainability.
- Asbeza** 📄, Ingredient Purchasing Platform 07/2024 – 08/2024
- Engineered the core frontend using **Next.js, and TypeScript** with modular architecture principles, focusing on high performance, responsiveness, and robust user experience.
 - Designed the system architecture to handle concurrent customers, demonstrating expertise in building distributed, high throughput systems capable of sustaining large operational loads.
 - Implemented real time inventory tracking and optimized delivery dispatch logic, enabling users to order ingredients flexibly while reducing shortages.
 - Developed the backend using .NET and Clean Architecture principles, implementing scalable APIs and robust business logic for a seamless and reliable user experience.

LEADERSHIP & EXTRACURRICULAR

- Co-Founder and Technical Lead** 📄, Competitive Programming Club (CP Club), AASTU 12/2024 – Present
- Co-Founded and served as Technical Lead for the **50+ member** CP Club, specifically mentoring ICPC preparation and strategy, demonstrating organizational leadership in highly technical domains.
- Data Structure and Algorithm Instructor** 📄, Google Developers Group AASTU 11/2024 – 06/2025
- Mentored **30+ students over 6 months**, establishing rigorous training methodologies in advanced Data Structures and Algorithms essential for competitive success.

Technical Skills

Languages: C++, Go, Python, JavaScript, Java, TypeScript, SQL | **Frameworks & Libraries:** Django, Gin, Next.js, React |
Databases: PostgreSQL, MongoDB, MySQL | **Developer Tools & Platforms:** Docker, Git, Twilio, OpenAI, CPanel, Postman, Redis

Achievements

- ICPC Ethiopian CPC 3rd Place, Advanced to ACPC Finals 📄
- 2024 Africa to Silicon Valley (A2SV) AI for Impact Hackathon Semi-Finalist 📄
- Algorithmic Mastery by solving 1300+ complex problems on LeetCode and Codeforces 📄
